Supplementary appendix

This appendix formed part of the original submission and has been peer reviewed. We post it as supplied by the authors.

Pregnant women with SARS-CoV-2 exposure
- Traveled to an affected country within the previous 14 days
- Close contact with a confirmed case of COVID-19 (i.e., <1 metre for >15 minutes, living together, direct contact with body fluids)

**CLINICAL EXAMINATION** + RT-PCR (SARS-CoV-2) on deep nasopharyngeal and pharyngeal samples

**ASYMPTOMATIC**
- No isolation room

**SARS-CoV-2 NEGATIVE**
- Isolation at home for 14 days
  - If delivery:
    - No breastfeeding
    - Mother isolated from newborn until viral shedding clears

**SARS-CoV-2 POSITIVE**
- MONITORING at home (T° + Respiratory symptoms)
  - Stop monitoring
  - US Fetal surveillance: Growth + Doppler / 2 weeks

**SYMPTOMATIC**
- Fever >38°C AND respiratory symptoms

**SARS-CoV-2 NEGATIVE**
- MONITORING AT HOSPITAL
  - Isolated room with negative pressure (IRNP)
  - Protective gear* for visitors / health personnel
  - Delivery and neonatal procedure equipment on site

**SARS-CoV-2 POSITIVE**
- Isolation at home 14 days
  - Clinical self-monitoring
  - If symptoms persist:
    - RETEST (possible false-negative)

**HOSPITALISATION IN A TERTIARY CARE CENTER**
- Maternal surveillance:
  - T°, HR, BP, RR (3–4x/day)
  - Chest imaging (high resolution CT-scan or X-ray)
- Fetal:
  - FHR (1x/day)
  - Fetal maturation by Betamethasone injection depending on maternal status (until 34 to 37 WG)
  - IV Antibiotics treatment (depending local protocol)

**RECOVERY**

**DELIVERY**
- Before 24 WG (fetal viability)
  - In case of severe maternal illness, consider TOP (if legal)
- After 24 WG
  - On site / IRNP
  - Vaginal delivery (induction of labor + instrumental delivery when possible unless severe failure criteria)
  - Early clamping of the umbilical cord
  - Early cleaning of the newborn
  - Newborn monitoring in IRNP
  - SARS-CoV-2 RT-PCR of the newborn
  - No breastfeeding
  - Mother isolated from newborn until viral shedding resolves

*PROTECTIVE GEAR*
- Contact and airborne additional measures
  - FFP2 or N95 mask
  - Gloves
  - Eye protection

SARS-CoV-2: severe acute respiratory syndrome 2; COVID-19: 2019 novel coronavirus disease; RT-PCR: reverse transcription polymerase chain reaction; T°: Temperature; HR: Heart Rate; BP: Blood Pressure; RR: Respiratory Rate; FHR: Fetal Heart Rate; CT: Computerized Tomography scan; X-ray: Radiography; TOP: Termination of pregnancy; IRNP: Isolated Room with Negative Pressure; RT-PCR: reverse transcription polymerase chain reaction; CT: Computed Tomography scan; X-ray: Radiography; FFP2: Filter Face Piece 2; N95: N95 mask; T°: Temperature; HR: Heart Rate; BP: Blood Pressure; RR: Respiratory Rate; FHR: Fetal Heart Rate; CT: Computerized Tomography scan; X-ray: Radiography; TOP: Termination of pregnancy; IRNP: Isolated Room with Negative Pressure
