Routine Outpatient Assessment in OPG for Pregnant Women

Pre-Screening Phone Call for ALL ambulatory patients

PASS

Screening AT OPG ENTRANCE

Fail screening at entrance

Pass screening at entrance

ROUTINE PRENATAL CARE

In person Screener (PPE Attired) to:
- Ask patient and *approved visitor to perform Hand Hygiene and don masks
- Move patient to waiting zone
- Waiting Zone RN (PPE Attired) completes Illness Severity Assessment, and
- Calls MRP/delegate

MRP/delegate to determine if the patient is *ill/not ill

FAIL

*ILL

If FAIL on phone screening, MRP/Delegate to call patient with directions

Not ILL

GA < 20 wks
Send to ED for for swab at SHS or local ED
MRP to follow up

GA ≥ 20 wks
L+D TRIAGE assessment & NP Swabs and consider admission at SHS or local ED, MRP follows up

If GA < 35 wks and NO significant concern for preterm delivery
ED/Hennick Gallery for NP swabs.

OPG Clinical Coordinator reviews log with MRP.
MRP determines next steps.

If GA >35wks or with significant concern for imminent delivery
LD Triage for Swabs
Triage MD determines next steps: Can DC patient before test result available if no acute concerns – communicate with MRP if the OB visit is required

Consider if:
- Presence of comorbidities
- Obstetrical issues
- Able to self monitor/follow directions/language barrier
- Inability to care for self

Defer OB clinic visit

Video-conference OB assessment

OB Clinic visit

Staff
- Droplet/contact Precautions Patient and *approved Visitor - Mask

Consider the following:
